General

Netatmo is a revolutionary smart home company, developing ground-breaking, intuitive and beautifully-designed connected consumer electronics. Truly smart, Netatmo's innovative products provide a seamless experience that helps users create a safer, healthier and more comfortable home.

Netatmo's continuous product development makes them a key player within the smart home industry.

NETATMO: Smart Thermostat

Netatmo smart thermostat offers all the controllability of a programmable thermostat with the ability to control your heating from anywhere in the world.

- Wi-Fi Enable Smart Heating offering the ability to monitor and change your heating conditions from Bed, Work or the other side of the World
- Program adaptation on first use by answering 5 simple questions to offer a base on which you can adjust your programs.
- Unlimited number of operations per day enabling you to simulate your lifestyle as accurately as possible.
- Environment awareness helps predict heating periods to give you the required temperature when you want it.

This is possible thanks to:

- continuous analysis of the thermal characteristics of the house
- continuous monitoring of the local outdoor temperature (forecast)
- Open window monitoring which will lower the heating operation when a large decrease in temperature is detected
- Maximum compatibility
 - Compatible with the majority of individual heating systems GAS, OIL, WOOD and HEAT PUMP
 - Compatible with more than 1500 heating systems

Check your system compatibility online at:

www.check.netatmo.com

Complete Wired or Wireless installation from a single box

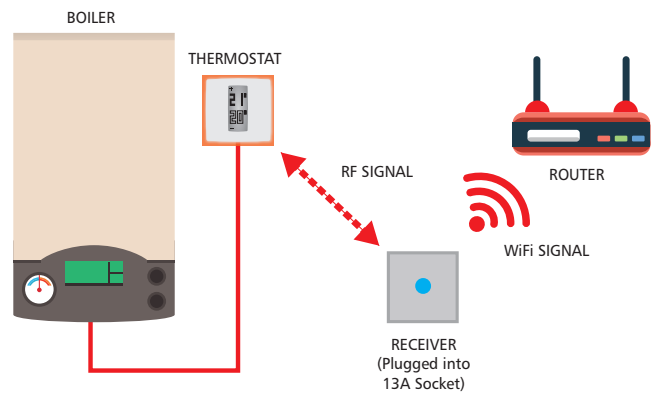

In The Box:

Operation

Manual Operation:

App Operation:

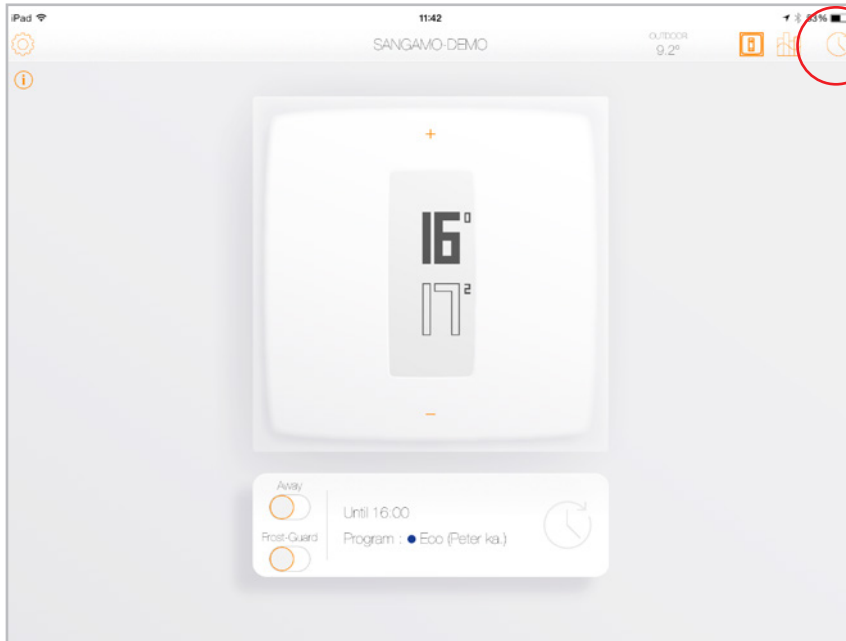

Away Button: Places the thermostat into Away mode to your pre-determined temperature. You will be prompted to add the date of your return so the thermostat will revert back to its schedule on that date (Ideal for Holidays)

Frost Guard Button: Places the thermostat into Frost Guard Mode to your pre-determined temperature (ideal for when your home is going to be unoccupied for a long period of time).

15 Minute Training - Module Netatmo Thermostat

training

App Operation:

By pressing the clock image in the top right hand corner this will take you to the programming menu

The 7 day program is laid out with colours to represent each time period, the colour also indicates the temperature that is set, ranging from dark blue, through green, to red for hotter temperatures.

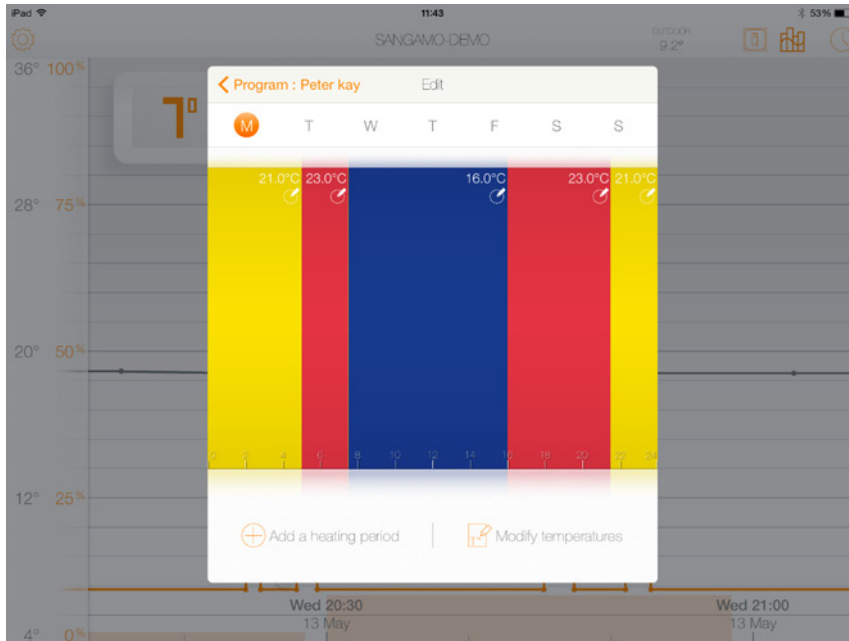

From here you can manage your weekly program.

...the complete solution

Tel: 01302 765573

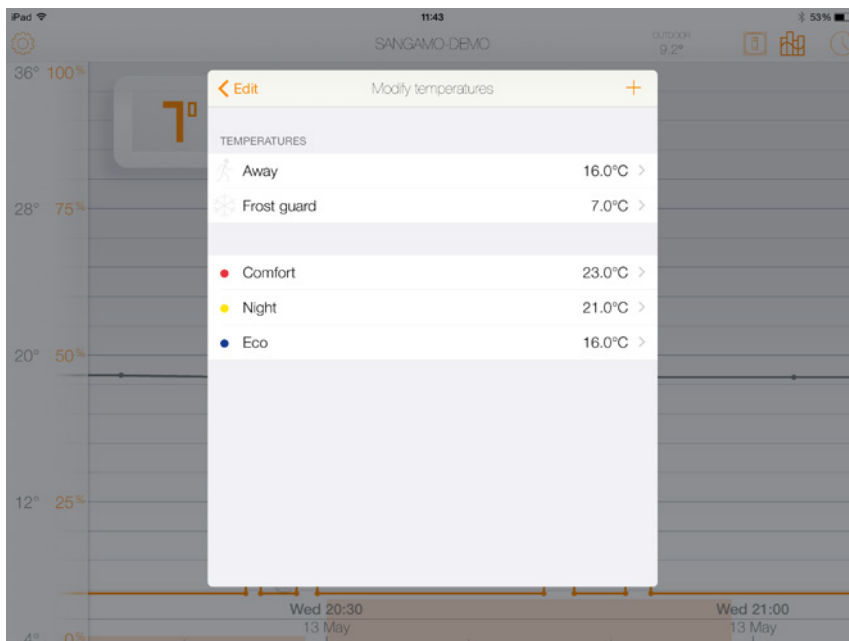

App Operation:

By pressing on the relevant day the above menu will appear, this shows your daily program with temperatures at the top of each timed period and hours along the bottom to show the schedules.

By Pressing on any of the schedules this will open up a screen which will ask for start and end times for this section. This will adjust the program.

To modify temperatures press the Modify Temperatures Icon, the below menu will appear.

From this screen you can alter your 5 temperatures

Away - Temperature to be used in your Away Mode

Frost Guard - Temperature to be used in your Frost Guard Mode

Comfort - Temperature you wish to maintain when the area is occupied

Night - Temperature you wish to maintain during the night

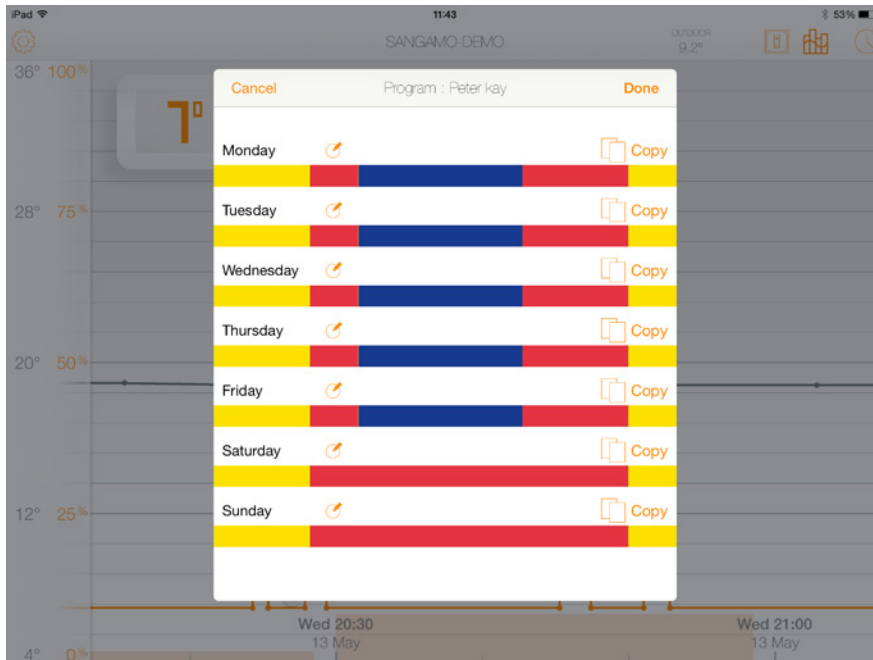

ECO - Temperature you wish to maintain when the area is un-occupied

All these can be adjusted by pressing on the temperature

training

App Operation:

Once you are happy with your program you have the ability to copy that program to other day by pressing the copy icon. This is very easy when replicating programs for days which follow the same routine (working week) By pressing Done this will take you back to your Home Screen.

By pressing the Graph icon in the top right of the screen you will be given details of your heating's performance.

...the complete solution

Tel: 01302 765573

App Operation:

The graph shows the following:

Grey Line: Recorded temperature by the Thermostat

Orange Line: Set Temperature of the Thermostat

Orange Bars: Percentage of time that the boiler was switch on

You can zoom in & out to get a longer or more detailed view by pinching the graph.

In the example each bar represents 1 hour of time

IFTTT
IFTTT, meaning 'If THIS Then THAT', is a free web-based third-party service that connects together all your smart-home devices, social media channels and smartphone to allow them all to control and monitor each other.

The best way to show what you can do with your Netatmo Thermostat and IFTTT is just to show some of the more popular 'recipies' (what IFTTT calls the instructions between two things) people have already created.

- Activate Away Mode when you leave home** by netatmo 137
- Get notified when someone changes your thermostat's temperature** by netatmo 305
- Get an email when your thermostat's batteries are low** by netatmo 252
- Set your thermostat to Away Mode when you're on holiday** by netatmo
- Turn off the lights when your thermostat is set to Away Mode** by netatmo 15

The Netatmo Thermostat utilises a free web-based third-party service that connects together your Smart Home devices, Social Media channels and Smart Device Applications to allow them to work together to offer a more connected experience.

Above is 5 commonly used recipies for your Netatmo Thermostat including Location services, Notifications, Emails, Calendars, as well as much, much more available at www.ifttt.com/netatmo_thermostat
